

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

**Claim 1** (currently amended) A surface mountable motor base, comprising:

a motor base;

a bearing supporter extending from said motor base for supporting a bearing;

a stator supporter concentric with said bearing supporter for supporting a stator; and

a plurality of terminals disposed around said bearing supporter for connection to a plurality of windings of said stator, ~~respectively, each of~~ said terminals having an upper face and a bottom face, the upper face of at least one of the terminals being coupled to at least one of the plurality of windings and the bottom faces of the terminals being exposed on a bottom of said motor base and extending substantially parallel to said motor base.

**Claim 2** (previously amended) The surface mountable motor base as defined in Claim 1, wherein a plurality of said motor bases are linked to each other.

**Claim 3** (previously amended) The surface mountable motor base as defined in Claim 1, wherein a plurality of said motor bases are linked to each other and form a belt-like shape.

**Claim 4** (previously amended) The surface mountable motor base as defined in Claim 3, wherein a plurality of said motor bases are linked to a frame in width direction of the belt-like shape, and adjacent said motor bases are separated in longitudinal direction.

**Claims 5-13** (currently cancelled).

**Claim 14** (previously added) The surface mountable motor base as defined in claim 1, wherein said surface mountable motor base is one of a plurality of surface mountable motor bases included in a frame.

**Claim 15** (previously added) The surface mountable motor base as defined in claim 1, wherein said terminal is flat.
